

Hydromantis Releases The World's First Mobile App Built Specifically For Wastewater Engineers

Hamilton, ON, October 12, 2011 – Hydromantis Environmental Software Solutions, Inc. (HESSI), the leading global provider of water and wastewater simulation software and consulting services announced today the release of *WaterUnits*, the industry's first mobile application providing common unit conversion specifically for wastewater engineers.

"We know there is a need for a convenient water and wastewater treatment specific unit conversion tool that can be utilized by our clients during site visits, meetings, presentations, and while interpreting scientific and technical reports" says Rajeev Goel, VP of Technology and Product Manager at Hydromantis, "This application was created for wastewater engineers by wastewater engineers and is the first of many we intend to offer".

Built for the Android operating system and available for download in the Android Market or via www.hydromantis.com, *WaterUnits* offers conversion between various Metric (SI) and Imperial (US) units commonly used by wastewater professionals.

"Hydromantis was the first company in the world to commercialize wastewater treatment modelling software so it only makes sense that we are one of the first to launch a mobile application such as this" commented Oliver Schraa, President of Hydromantis. "We continue to set the industry standard in leveraging technology to the benefit of our water and wastewater engineering clients."

About Hydromantis

Hydromantis Environmental Software Solutions, Inc. traces its roots back over 25 years as the global pioneer in the development of water and wastewater simulation technology. Based in Hamilton, Ontario, Canada, Hydromantis offers expert consulting for treatment plant modelling, design and optimization and is the developer and owner of the industry's most advanced modelling and simulation software including: GPS-X™, Toxchem™, CapdetWorks™ and WatPro™.
