

HYDROMANTIS RELEASES CAPDEWORKS™ V3.0 – A POWERFUL TOOL FOR PRELIMINARY DESIGN AND FINANCIAL PLANNING OF WASTEWATER TREATMENT PLANTS

(Hamilton, ON Canada) – December 4, 2014 - [Hydromantis Environmental Software Solutions, Inc.](http://www.hydromantis.com) (Hydromantis), the leading global provider of water and wastewater simulation software and professional modelling services, announced today the latest release of CapdetWorks™ Version 3.0. CapdetWorks™ is based on the U.S. EPA CAPDET – “Computer Assisted Procedure for Design and Evaluation of Treatment Systems” program. CapdetWorks is the industry's only software tool for fast and accurate preliminary design and cost estimation of wastewater treatment plant construction projects.

This latest version of CapdetWorks™ includes several new features to extend its capabilities and making engineering tasks more efficient and productive. The new unit process models for MBBR, IFAS and MBR technologies will allow users to expand analysis beyond the conventional activated sludge based layouts.

The new version comes with updated Cost Database and new set of Hydromantis Cost Indices which are regularly updated through the Hydromantis website. The capital cost estimation summaries are improved to provide cost contribution of each individual item. The new Output Tool Bar allows the user to view the details of the cost estimates and water quality in a quick efficient manner.

“The release of the new version of CapdetWorks demonstrates our commitment of continuous support to meet the expectations of our valued clients and provide regular improvements of the industry’s recognized valued engineering tools” said Dr. Rajeev Goel, President of Hydromantis.

About Hydromantis

[Hydromantis Environmental Software Solutions, Inc.](http://www.hydromantis.com) traces its roots back over 29 years as the global pioneer in the development of water and wastewater simulation technology. Based in Hamilton, Ontario, Canada, Hydromantis offers expert professional services for treatment plant modelling, design and optimization and is the developer and owner of the industry’s most advanced modelling and simulation software solutions including: GPS-X™, SimuWorks™, Toxchem™, CapdetWorks™ and WatPro™.
