

## **Hydromantis and The City of Hamilton to demonstrate an advanced wastewater treatment plant operator training and development platform at WEFTEC 2012 in New Orleans**

**Hamilton, ON, August 20<sup>th</sup>, 2012** – Hydromantis Environmental Software Solutions, Inc. (Hydromantis), the leading global provider of water and wastewater simulation software and professional services, announced today that representatives from The City of Hamilton (Hamilton) will be joining them at WEFTEC 2012, the largest annual water quality exhibition in the world.

The two organizations are teaming up in the Hydromantis exhibit booth, #2645, for a hands-on demonstration of Hamilton's *SimuWorks™* implementation; a state-of-the-art operator training and development platform developed in collaboration with Hydromantis and a key feature at Hamilton's recently announced Water/Wastewater Demonstration and Training Centre.

"We are excited to have City of Hamilton representatives on hand to discuss their *SimuWorks™* implementation". Said Darren Richarz, Hydromantis Sales and Marketing VP. "Hamilton's deployment is very advanced, utilizing actual SCADA screen interfaces for a highly realistic operator training experience."

Like the flight simulators airlines use to train pilots in routine tasks and not-so-routine eventualities, *SimuWorks™* offers advanced operator training and development, plant optimization and analysis, and maintenance and project risk management opportunities. Leveraging Hydromantis' industry leading simulation technology *GPS-X™*, *SimuWorks™* customized dashboards offer familiar interfaces for operators and closely replicated plant behavior and response within a safe, risk-free environment.

"WEFTEC is the premier water and wastewater industry conference and we are pleased to be exhibiting with Hydromantis. SaidCarolynn Reid, Business Development Consultant of the City's Economic Development Department. "It's a wonderful opportunity to showcase our work and partnership with Hydromantis and the commitment Hamilton has to staying on the leading edge in the water and wastewater industry."

### **About Hydromantis**

[Hydromantis Environmental Software Solutions, Inc.](#), traces its roots back over 26 years as a global pioneer in the development of water and wastewater simulation technology. Based in Hamilton, Ontario, Canada, Hydromantis offers expert professional services for treatment plant modeling, design and optimization and they are the developer and owner of the industry's most popular modeling and simulation software including: *GPS-X™*, *SimuWorks™*, *TOXCHEM™*, *CapdetWorks™* and *WatPro™*.

### **About The City of Hamilton**

[Hamilton](#), with a population of over 500,000 is one of Canada's major cities and is one of Ontario's most economically diverse. Our major economic sectors include: advanced manufacturing, agriculture/food processing, creative industries, life sciences, transportation/goods movement and clean-technology targeting water and wastewater companies who are predominantly engaged in activities working within

Advanced Water Purification Technologies; Wastewater Treatment Technologies that treat grey water or wastewater from residential and industrial consumers & Water Resources Management Technologies. To support this the City of Hamilton's Water/Wastewater Demonstration & Training Centre offers dedicated pilot facilities committed to supporting technology and innovation that improves water and wastewater operations.
